QUIET#.

### About the built-in answering system and voicemail service

For message recording, your telephone has a built-in answering system, and it also supports voicemail service offered by your telephone service provider (subscription is required, and fee may apply). The main differences between them are:

	Category	Built-in answering system	Voicemail from telephone service
	Storage	Messages are stored in the telephone base.	Messages are stored in a server or system provided by your telephone service provider.
		You messages will not be deleted automatically. You have to delete your message manually.	Your messages may be automatically deleted after a period of time. Contact your telephone service provider for more details.
	Method to retrieve messages	When you received new messages, the handset and the telephone base both display XX new messages, and the \[ \shim \] \[ \shim \] \[ \PLAY/STOP \] light on the telephone base flashes.	When you receive new messages, the handset and the telephone base display and New voicemail.
		To retrieve messages, usually there are two ways:  Press / W PLAY/STOP on the telephone base; or  Access remotely with an access	To retrieve messages, you need an access number and/or a password provided by your telephone service provider.

# Set your built-in answering system

up to 99 messages. Each message can be up to three minutes in length. The total storage capacity for the announcement, messages and nemos is approximately 11 minutes. The actual recording time depends on individual message

Your answering system allows you to set your announcement, to save and delete messages ctivate call screening, to set number of rings before pick up, to access remotely, and to control

### Consult the dealer or an experienced radio/TV technician for help.

sired operatior

To ensure safety of users, the FCC has established criteria for the amount of radio frequency energy that can be safely absorbed by a user or bystander according to the intended usage of the product. This product has been tested and found to comply with th FCC criteria. The handset shall be installed and used such that parts of all persons' body are maintained at a distance of approximately 8 in (20 cm) or more. This Class B digital apparatus complies with Canadian requirement CAN ICES-3 (B)/NMB-3(B)

ACTA). The label on the back or bottom of this dentifier must be provided to your telephone ser provider upon request he plug and jack used to connect this equipmen

to premises wiring and the telephone network must comply with applicable Part 68 rules and technical requirements adopted by ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. An RJ11 jack should normally be used for connecting to a single line and an RJ14 jack for two lines. See the installation instructions in the user's manual. The Ringer Equivalence Number (REN) is used to

determine how many devices you may connect to your elephone line and still have them ring when you are called. The REN for this product is encoded as the 6th and 7th characters following the US: in the product identifier (e.g., if #is 03, the REN is 0.3). In most, but not all areas, the sum of all RENs should be five (5.0) or less. For more information, please contact your telephone service provider. This equipment may not be used with Party Lines.

If you have specially wired alarm dialing equipment connected to your telephone line, ensure the connection of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephon service provider or a qualified installer. If this equipment is malfunctioning, it must be

its authorized agents. For repair procedures, follow the instructions outlined under the Limited warranty If this equipment is causing harm to the telephone network, the telephone service provider may temporarily discontinue your telephone service. The telephone service provider is required to notify you before interrupting service. If advance notice is not practical, you will be notified as soon as possible. Il be given the opportunity to correct the problem and the telephone service provider is required to inform you of your right to file a complaint with the

# FCC. Your telephone service provider may make

nandset, it is hearing aid compatible store or test emergency numbers, please:
