VM981

VTech Wi-Fi HD Video Monitor allows you to stay close to your baby when you are on the move or away. This monitor is Wi-Fi enabled, which uses your home wireless network to stream live video and audio through the HD camera unit and 5-inch touch screen parent unit. It allows you to maintain a constant connection to your baby.

You can also monitor from your smartphone and mobile tablet.
VTech Wi-Fi HD Video Monitor uses MyVTech Baby app to let you instantly see and hear what's happening with your baby from anywhere in the world. The app can be downloaded from the App Store or the Google Play™ Store, directly from your smartphone or mobile tablet.

Quick start guide
(Canada version)
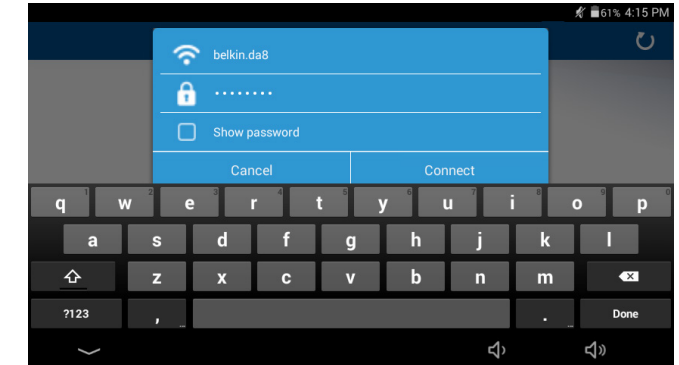

1 Set up Wi-Fi connection

1 After the parent unit is fully charged, power on the parent unit.

3s

**2** Tap to select your preferred and secured 2.4GHz Wi-Fi network with good signal strength.

Wi-Fi Setting
Select Wi-Fi
Select a password-protected 2.4GHz Wi-Fi network for your baby monitor from the list below. The network must be password-protected to connect. If your network is hidden, set it to visible during installation.

- belkin.da8
- TP-LINK_AA56
- VTE-DETESTTP
- External
- XA Ultra

3 Type in the password of the Wi-Fi network, and then tap **Connect**.

....
Show password
Cancel   Connect

2 Add camera

1 After connecting the parent unit to your Wi-Fi network, tap to select the VM981 camera.

Add Camera
① ② ③ ④
Select camera model

2 Follow the instructions shown on screen, then tap →.

Add Camera
① ② ③ ④
Prepare camera for installation

1.Connect the power cord to the camera

2.Wait until the orange LED stays on

3.Press and hold the Pair/Reset button on the bottom of the camera. Release when you see the blue and orange LEDs flashing. Then tap next.
3
- Create a security key for the camera. Repeat entering the security key to confirm. The security key must contain 8 to 12 alphanumeric characters with at least one uppercase character and one number.
- Tap → to continue.

Add Camera
① ② ③ ④
Setup camera name and security key
The camera will be added to the same WiFi network as the parent unit.
Please enter desired camera name and security key.

Wi-Fi	belkin.da8
Camera name	VTECH_980_6452
Security key	Security key
Confirm security key	Confirm security key

Security key must contain 8 to 12 characters, at least 1 uppercase letter and 1 number. It should not contain special characters.

🔗 NOTE
- Write down or remember the security key. You will need to provide the same security key if you want to access your camera remotely.

4 After the camera unit is successfully added to your parent unit, the split screen displays the preview of your camera unit.
- The split screen displays two camera previews. If you have more than two camera units, swipe to left shows more of your camera units.

Remote monitoring

1 Download the free **MyVTech Baby** mobile app from the App Store or Google Play store and install it to a mobile device, then you can use your mobile device and the mobile app to monitor your areas remotely.

⊘ NOTE

- Make sure your mobile device meets the minimum requirement for the mobile app.

Minimum requirement
The mobile app is compatible with:
- Android™ 4.4 or later; and
- iOS 8.0 or later.

Install MyVTech Baby mobile app
1. Browse the App Store or the Google Play store.
2. Search for the mobile app with the keyword "myvtech baby".
3. Download and install the **MyVTech Baby** mobile app to your mobile device.

Driven by Android and iOS updates, **MyVTech Baby** mobile app, app manual, and online FAQs will be updated periodically.

Download and install the latest mobile app. For latest information and supports, go and check the app manual and online FAQs.

2 Tap 🔲 to run the mobile app on your mobile device, and then create a camera account.
- We recommend that you use common webmail services, such as Google Gmail for registration of your camera account.
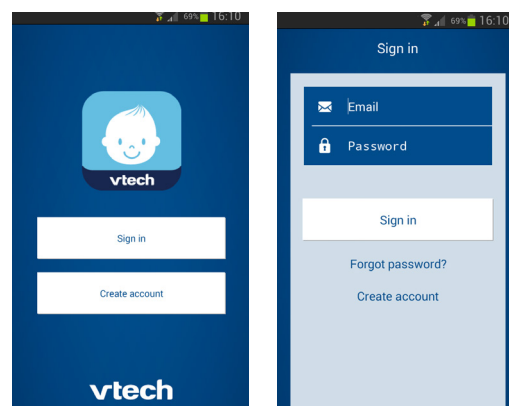

3 Check your email (and Spam folder), and activate your new camera account via the email link, then sign in to your account.
4 Follow the instructions on the screen to add the camera to your camera account.
- Make sure your mobile device is connected to the 2.4GHz Wi-Fi network that your parent unit has connected to when adding the camera.

5 Type in the security key you have set for the camera with your parent unit. See Step 3 in **2 Add camera** section.
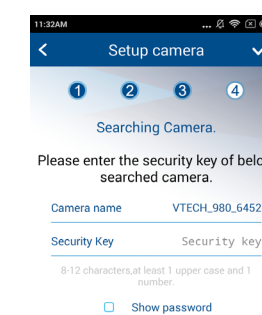

6 Start using your monitoring system remotely.

⊘ NOTES

- You must complete the camera setup in the above **1 Set up Wi-Fi network** and **2 Add camera** sections before you can access your camera remotely.
- Your parent unit can pair and access a maximum of 4 camera units. You can add more camera units to your HD video monitor system using the **MyVTech Baby** mobile app. Download the mobile app and create a camera account. Then, you can use the mobile app to pair your existing camera units in your parent unit to your camera account, and also pair additional camera units to your account. The mobile app can pair and access up to 10 camera units. The additional camera units can only be paired and accessed via the mobile app.
- Tap ≡ on the split screen to display the side menu, and then tap **Help** to refer to the online mobile app manual for the complete operation instructions. You can also scan the QR code on the right to open the manual in a web browser.
